

RootX Application Amounts

The amount of RootX needed depends upon the size of the sewer line or septic. The application amounts are as follows:

For Sewers:

Up to 50' of a 4" line – one 2lb

Up to 100' of a 4" line – one 4lb OR two 2lbs

Up to 75' of a 6" line – one 4lb OR two 2lbs

For Septics:

500 gallon tank – one 4lb

1000 gallon tank – two 4lbs

1500 gallon tank – three 4lbs

For Drainfields:

Up to 50' of a 4" line – one 2lb

Up to 100' of a 4" line – one 4lb

Up to 75' of a 6" line – one 4lb

If you require a 2lb. jar of RootX, you have two options for applying – you can choose to apply it either into the sewer clean-out or into the toilet.

If you require a 4lb. jar, it must only be applied into the sewer clean-out or septic tank.

Each jar of RootX is one complete application and cannot be divided. Directions for use are included with every order along with a mask and latex-free gloves.
