

Top 10 Answers to “Why RootX?”

1. Tree roots will start to regrow just a few weeks after cutting, eventually causing a repeat root blockage without a RootX application.
2. Cutting roots stimulates new growth like pruning plants. The roots will actually come back thicker and stronger causing more frequent blockages and further pipe damage.
3. RootX is non-systemic so it will not harm the trees or other plants.
4. RootX is non-caustic so it will not damage piping or septic systems.
5. RootX foams on contact with water to kill the roots at the top and sides of the pipe where the majority of the roots enter.
6. RootX has low environmental impact and is EPA registered in all 50 states (EPA Reg. No. 68464-1) and Canada (PCP Act Reg. No. 26435).
7. RootX not only kills roots but is guaranteed to prevent a blockage due to live roots for one full year when applied by a plumbing professional (customer registration is required).
8. RootX offers a complimentary annual reminder when it is time to schedule another RootX treatment.
9. RootX is simple to apply and is effective in sewer lines, storm lines and septic systems.
10. RootX has proven to work over the company's 23-year history.
